

## **Recreational Trails Program**

### **Department of Natural Resources**

The Recreational Trails Program (RTP) was authorized in the Transportation Equity Act for the 21st Century (TEA-21) in 1998. The RTP is a Federal-aid assistance program to help States provide and maintain recreational trails for both motorized and non motorized recreational trail use. Annual funding for this program is approximately \$1,000,000. The program provides funds for all kinds of recreational trail uses, such as pedestrian uses (hiking, running, wheelchair use), bicycling, in-line skating, equestrian use, cross-country skiing, snow-mobiling, off-road motorcycling, all-terrain vehicle riding, four-wheel driving, or using other off-road motorized vehicles. Each State develops its own procedures to solicit projects from project sponsors, and to select projects for funding in response to recreation trail needs within the State. The RTP encourages all kinds of trail enthusiasts to work together to provide a wide variety of recreational trail opportunities. Fiscal year 2000 projects will not be selected until the fall of 2000.
